PROFILE

Full Stack Developer with previous experience in both the customer service and marketing departments of two of Sweden's fastest growing and successful e-commerce. My interest for coding sparked as a teenager and my current long term ambition is to continuously grow as a developer.

TECH STACK

C#, .Net Core, EF Core, MsSql, Blazor, JavaScript, React, Angular, HTML, SCSS, bootstrap and much more. I'm of course more than happy to learn new languages and frameworks in order to adapt to my work place's tech stack.
